

Align-items:

Align-items determines the default behavior for how flex items are laid out along the cross axis on the current line. Think of it as the justify-content version for the cross axis.

< Previous

next >

Stretched:

align-items: stretch; on container

Not Stretched:

align-items: flex-start; on container

align-items: center; on container

align-items: flex-end; on container

align-items: baseline; on container
