

⚡ Current Skill CSS Display : inline

▮

Display: inline

Like the name indicates, this feature enables you to put specified HTML elements in the same line.

📄 Let's understand it with an example.

- HTML

```
<p>One</p>
<p>Two</p>
<p>Three</p>
```

- CSS

```
p {
  display: inline;
}
```

- Output

One Two Three
