HTTP Response

When a client (browser) makes a request to a server, the server responds with a reply including a status code.

HTTP response status codes indicate whether a specific HTTP request has been successfully completed. Responses are grouped in five classes:

Informational responses (100–199),

Successful responses (200–299),

Redirects (300–399),

Client errors (400–499),

and Server errors (500–599).

Status: 200 OK   Time: 149ms   Size: 3.58 KB
